Portfolio Website

Profile Summary

Versatile Full-Stack Developer skilled in React, Node.js, and Express, with experience in building scalable web and mobile applications. Proficient in front-end design, back-end development, and API integration. Committed to delivering high-quality solutions and optimizing user experiences.

Skills

Javascript | NodeJS | Java | Python | HTML | CSS | React | React-Native | MongoDB | Express | Firebase | Git | GitHub

Education

MES Institute of Management & Career Courses (IMCC), Pune   **2023 - 2025**
- MCA | CGPA: **-**   (expected)

K.R.T. Arts, BH Commerce and A.M Science (KTHM) College, Nashik   **2020 - 2023**
- *BCS* | CGPA: 8.49

K.A.A.N.M.S College, Satana   **2019 - 2020**
- CLASS XII | Percentage: 94.4%

Projects

Laundry App

A mobile application that enables users to register, log in, select laundry services, specify quantity, and place orders with an address. Admins have access to view and manage orders*.*

Tools*: React Native, Firebase*
- Developed the front-end using React Native, creating an intuitive and user-friendly interface for mobile devices.
- Integrated Firebase for user authentication and real-time database management, facilitating user registration, login, and order processing.
- Implemented features for users to choose laundry services, add quantities, and specify addresses for their orders.
- Created an admin panel for viewing and managing orders, providing effective oversight and control.

Clothes Rental System

A web application that facilitates the renting of clothes, allowing users to browse, select, and place rental orders. Lenders and renters can use a chat feature for seamless communication.

Tools: *React, Express, MongoDB, Socket.IO*
- Developed the front-end using React to provide a seamless browsing and rental experience for users.
- Built the backend with Express and MongoDB for efficient order processing and inventory management.
- Implemented features for users to filter and select clothes based on categories, sizes, and styles.
- Integrated a real-time chat feature using Socket.IO to enable communication between lenders and renters.
